School Management Information System · How to use every module

Generated 18 August 2026

1. Welcome

EasySchool is the school management information system used to run day-to-day academic, finance, HR, shop, and communication work. What you see in the left menu depends on the **user category** (role) assigned to your login. An administrator can grant extra pages under *User Management* → *User Categories*.

This manual lists **every module in the system**, then walks through how to use each one. The pictures are labelled figures that match the live screens.

Before you start. Ask an administrator for your email (or staff ID) and password. Set the school name, logo, current academic year, and term under Settings so bills, reports, and report cards print with the correct letterhead.

How the screen is laid out

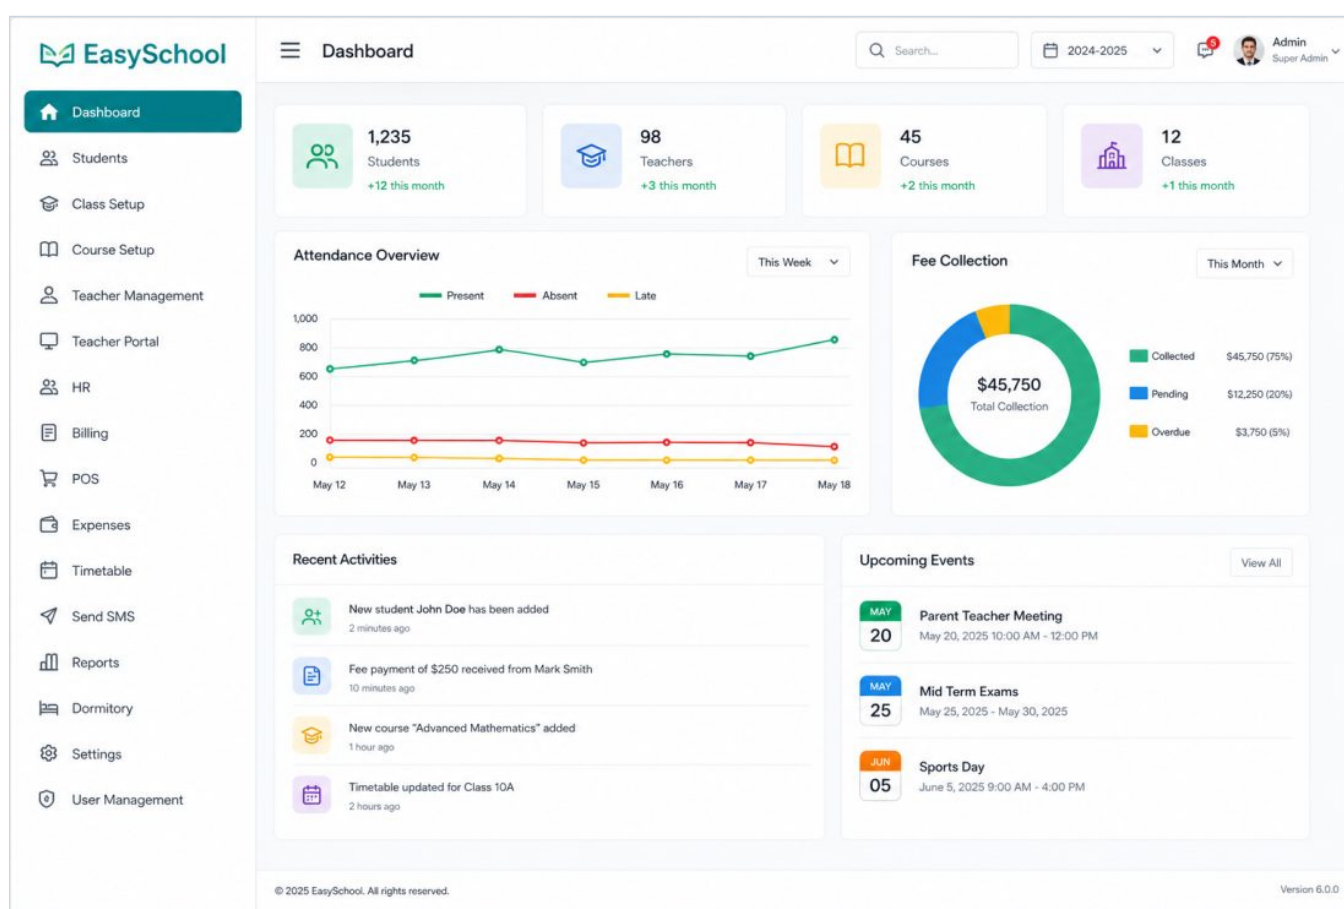

Figure 1. Left sidebar — open a module here. The items you see depend on your access.

1. **Sidebar (left)** — main modules. Click a heading to open its pages.
2. **Top bar** — your name, photo, and logout.
3. **Page header** — title, breadcrumbs, and action buttons (Add, Print, PDF, Excel).
4. **Work area** — forms, tables, KPI cards, and filters.

2. Complete module list

These are all parent modules and their pages in EasySchool.

Module	Pages / functions	Typical users
Dashboard	Role-aware home, KPIs, shortcuts, charts	Everyone
Students	Register New Student; Student List; view / edit / print profile	Admin, office
Class Setup	Classes; Class Categories; Student Class Assignment; Student Promotion	Admin
Course Setup	Add Course (and sub-courses); Course Registration	Admin
Teacher Management	Teacher Directory; Class Teachers; Course Teachers; Grading Scheme	Admin
Teacher Portal	Dashboard; Attendance; Assessments; Assessment Records; Gradebook; report cards	Teachers
HR	Dashboard; Add Employee; Employees; Departments; Positions; Leave; Attendance; Salary Structures; Payroll; Payslips; Appraisals; Statutory Settings	HR, admin
Bill Management	Billing Items; Category Bill Setup; Student Bills; Edit Student Bills; Print Bills; Record Payment (Cash / MoMo / Paystack)	Bursar, cashier
POS	New Sale; Sales History; Products; Categories; Stock Adjustments	Shop / cashier
Expenses	Record Expenses; Expense Categories	Bursar, admin
Timetable	Class Timetables; Period times; generate week; print	Admin
Send SMS	Compose SMS to teachers, staff, a class, whole school, or individuals	Admin, office
Reports	Students; Enrolment; Staff; Leave; Staff attendance; Payroll; Fee collection; Outstanding bills; POS sales; Expenses; Class attendance; SMS log — each with Print, PDF, Excel	Admin, management
Parent Portal	Parent sign-in; dashboard; child overview; academics; fees & bills (Paystack); payment history & receipts; report card; messages to school	Parents / guardians
Parent Messages	Inbox of messages sent by parents (staff view under Send SMS)	Admin, office
Dormitory	Houses; dormitories; beds; assign / unassign students	Admin, boarding
Settings	School Firm Setup; Academic Years; Academic Terms; Academic Session; Assessment Types; Promotion Settings	Admin
User Management	User Categories (roles and menu access)	Admin
Profile	Your photo and password	Everyone

3. Sign in and sign out

EasySchool

Welcome to EasySchool

The all-in-one school management platform that simplifies administration, enhances learning, and connects your entire school community.

- Secure**
Your data is safe with enterprise grade security.
- Connected**
Bringing teachers, students and parents together.
- Efficient**
Streamline tasks and save valuable time every day.

or

Don't have an account? [Contact your school administrator](#)

Figure 2. Sign-in page. Use the email or staff ID your school gave you.

How to sign in

1. Open the school EasySchool address in your browser (for example `http://127.0.0.1:8001` on this computer).
2. In **Staff / Student ID / Email**, type your email address.
3. Type your password. Use the eye icon if you need to check what you typed.
4. Click **Sign in**.
5. You land on the Dashboard. Only menus your category is allowed to see appear in the sidebar.

Locked account. Repeated wrong passwords can lock the account. Ask an administrator to unlock you or reset the password from the staff record.

How to sign out

1. Open your name or photo in the top-right corner.
2. Choose logout. Always sign out on a shared computer.

4. Dashboard

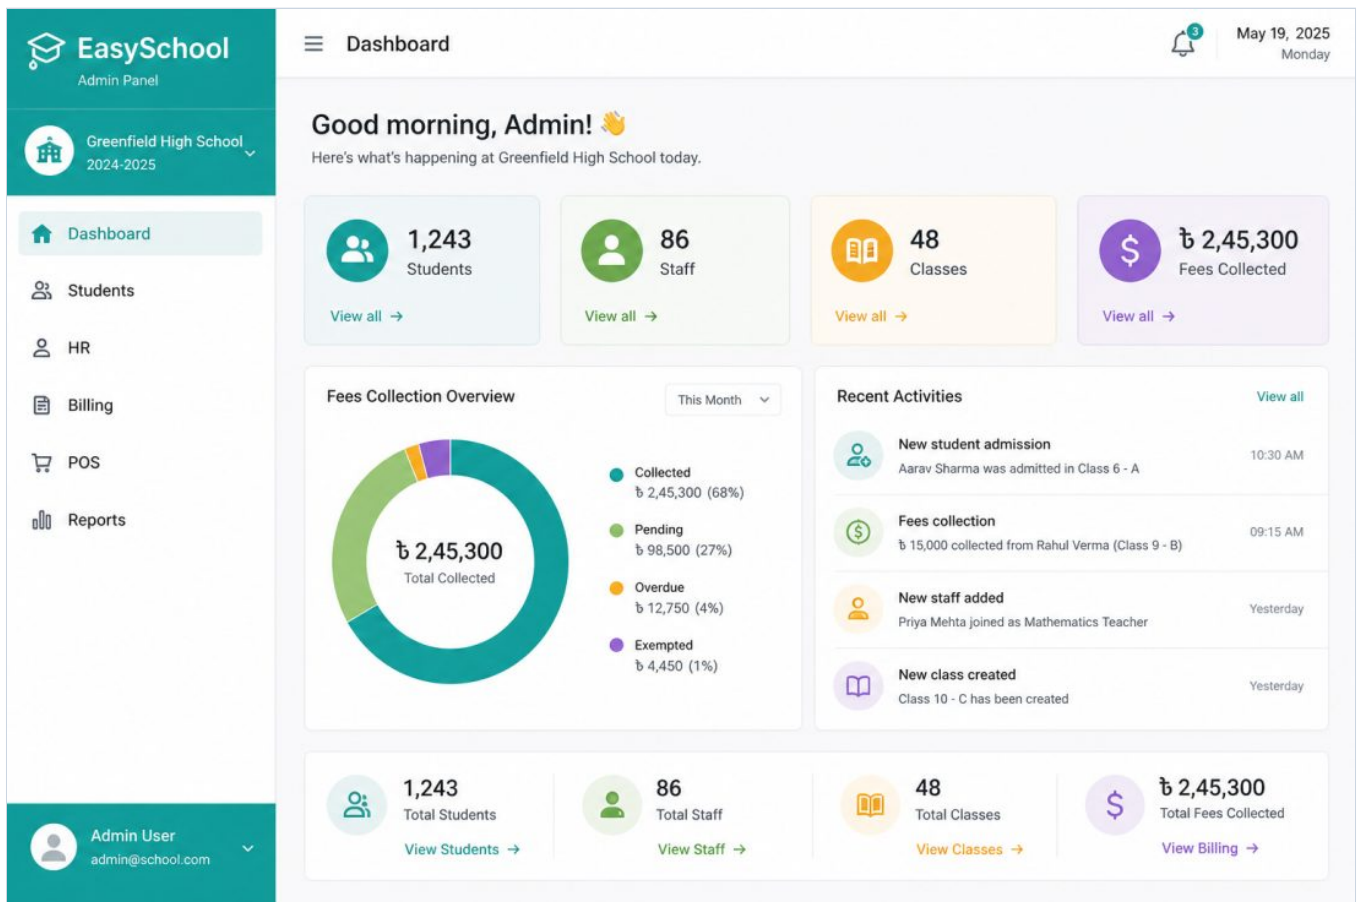

Figure 3. Dashboard with KPI cards, shortcuts, and charts filtered to your privileges.

1. After login you see a greeting, your role badge, and the current academic year / term (if set).
2. Coloured cards show counts you are allowed to see (students, staff, classes, fees, and so on).
3. Shortcut tiles open a module in one click (for example Reports or POS).
4. Charts (if shown) summarise attendance, fees, or similar data for your role.
5. If you see “No modules are assigned”, ask an administrator to grant menu access on your user category.

5. Students

Use this module to admit learners, keep their records, and print profiles.

5.1 Register a new student

Menu: Students → Register New Student

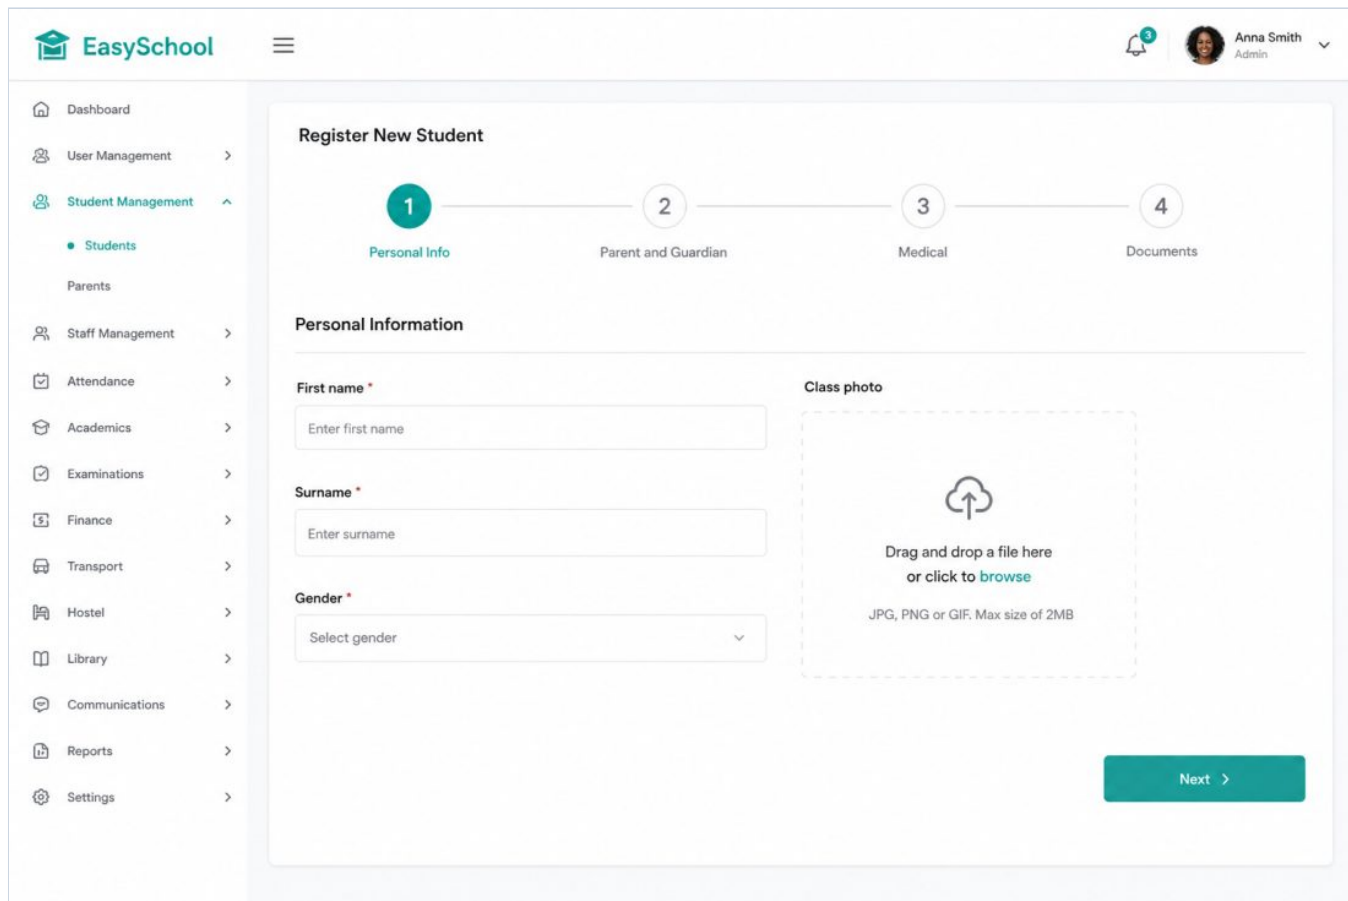

Figure 4. Four-step registration wizard: Personal, Parent, Medical, Documents.

1. Open **Register New Student**. A student ID is prepared for you.
2. **Step 1 — Personal Info**. Enter name, gender, date of birth, class (optional at this stage), photo, and contact fields. Required fields must be filled before you continue.
3. Click **Save & continue** (the draft is stored so you do not lose work).
4. **Step 2 — Parent & Guardian**. Enter father, mother, and guardian names and phones. Guardian phone is important for SMS and bills.
5. **Step 3 — Medical & Other**. Add medical notes, addresses, and extra remarks.
6. **Step 4 — Documents**. Attach birth certificate, previous school reports, or other files.
7. Click **Register Student**. The learner appears on the Student List with status Active.

Tip. You can place a student in a class later under Class Setup → Student Class Assignment if you skip class on step 1.

5.2 Student list, view, edit, print

Menu: Students → Student List

Showing 1 to 10 of 120 students

< 1 2 3 ... 12 >

Figure 5. Student list with search, class filter, avatars, and status pills.

1. Filter by class or status, or type a name / ID in search.
2. Open a row to **view** the full profile (personal, parents, medical, documents, bills).
3. Use **Edit** to change details with the same four-step wizard.
4. Use **Print** for a paper profile. A signed public profile link can also be used where enabled.
5. Inactive students stay in history; they no longer appear as Active on enrolment reports if you filter to Active.

6. Class Setup

6.1 Class categories

Menu: Class Setup → Class Categories

1. Add groups such as Creche, KG, Primary, JHS. These drive **Category Bill Setup** (the same fee pack for every class in the category).
2. Give each category a clear name and keep it Active.

6.2 Classes

Menu: Class Setup → Classes

1. Click add, enter the class name (for example *P3 A*), pick a category, and save.
2. Keep unused classes Inactive instead of deleting them if they already have history.

6.3 Assign students to classes

Menu: Class Setup → Student Class Assignment

1. Search a student, choose the destination class, and assign.
2. Use bulk assignment to move a list of unassigned or selected learners into one class.
3. Preview before you confirm a bulk move.

6.4 Student promotion

Menu: Class Setup → Student Promotion

1. First set pass marks under Settings → Promotion Settings.
2. Open a class. EasySchool shows who meets the promotion rule.
3. Select learners and promote them to the next class for the new year.

Promotion uses assessment scores and the grading / promotion settings. Complete gradebook entry before you promote.

7. Course Setup

7.1 Add courses

Menu: Course Setup → Add Course (or the courses page in that menu)

1. Create a course (for example English Language). You can add sub-courses where the school splits a subject.
2. Keep names aligned with the Ghana Education Service subjects your school teaches.

7.2 Course registration

Menu: Course Setup → Course Registration

1. Pick the class (and year/term if asked).
2. Tick the courses that class should take this term.
3. Unregister a course if it was added by mistake. Teachers only see classes/courses they are assigned to.

8. Teacher Management

This is the office side of teaching. Daily marking lives in the Teacher Portal.

8.1 Teacher directory

Lists staff flagged as teachers. Open a person to jump to their employee record.

8.2 Class teachers (homeroom)

Menu: Teacher Management → Class Teachers

1. Pick a class and assign the homeroom teacher.
2. That teacher gets the class on Teacher Portal → Attendance and can take the daily register.
3. Unassign if the teacher leaves the class.

8.3 Course teachers

Menu: Teacher Management → Course Teachers

1. Assign a teacher to a course in a class (for example Maths in JHS 2).
2. That teacher can create assessments and enter scores for that course.

8.4 Grading scheme

Menu: Teacher Management → Grading Scheme

1. Define grade letters and mark ranges (for example A = 80–100).
2. Report cards and promotion use this scheme. Edit carefully once a term has scores.

9. Teacher Portal

Teachers use this menu for daily work. Subject teachers see their courses; class teachers also see homeroom attendance.

9.1 Teacher dashboard

1. Open **Teacher Portal → Dashboard**.
2. You see your homeroom classes and course assignments as cards.
3. Use Roster, Attendance, Assessments, or Gradebook on each card.

9.2 Take class attendance

Menu: Teacher Portal → Attendance

#	Student	Status	Remarks (Optional)
1	Alexander Thompson ES1001	Present	Add remark
2	Ava Martinez ES1002	Absent	Add remark
3	Benjamin Harris ES1003	Present	Add remark
4	Charlotte Anderson ES1004	Late	Add remark
5	Daniel Clark ES1005	Present	Add remark
6	Emily Lewis ES1006	Excused	Add remark
7	James Walker ES1007	Present	Add remark
8	Isabella Young ES1008	Absent	Add remark

Figure 6. Daily mark sheet. Homeroom teachers mark Present, Absent, Late, or Excused.

1. Open Attendance. Only your homeroom classes appear as cards.
2. Click **Open Mark Sheet**.
3. Choose the date (defaults to today).
4. For each student tap **Present**, **Absent**, **Late**, or **Excused**. Add a short note if needed (for example sick).
5. Save the register. Office staff can later print the Class attendance report.

Subject teachers do not mark the daily register unless they are also the class teacher.

9.3 Assessments and scores

Menu: Teacher Portal → Assessments

1. Open a class or a course workspace.
2. Create an assessment: name, type (homework, class test, exam — from Settings → Assessment Types), date, and total marks.
3. Open **Scores** and enter each student's mark. Save.
4. Assessment Records lists past assessments. You can delete an assessment only if your school allows it and scores are not locked.

9.4 Gradebook and report cards

Menu: Teacher Portal → Gradebook

1. Open the class gradebook for the current year and term.
2. Review combined scores and grades from the grading scheme.
3. Print one student's report card, or print the whole class set (school letterhead comes from Settings).

10. HR

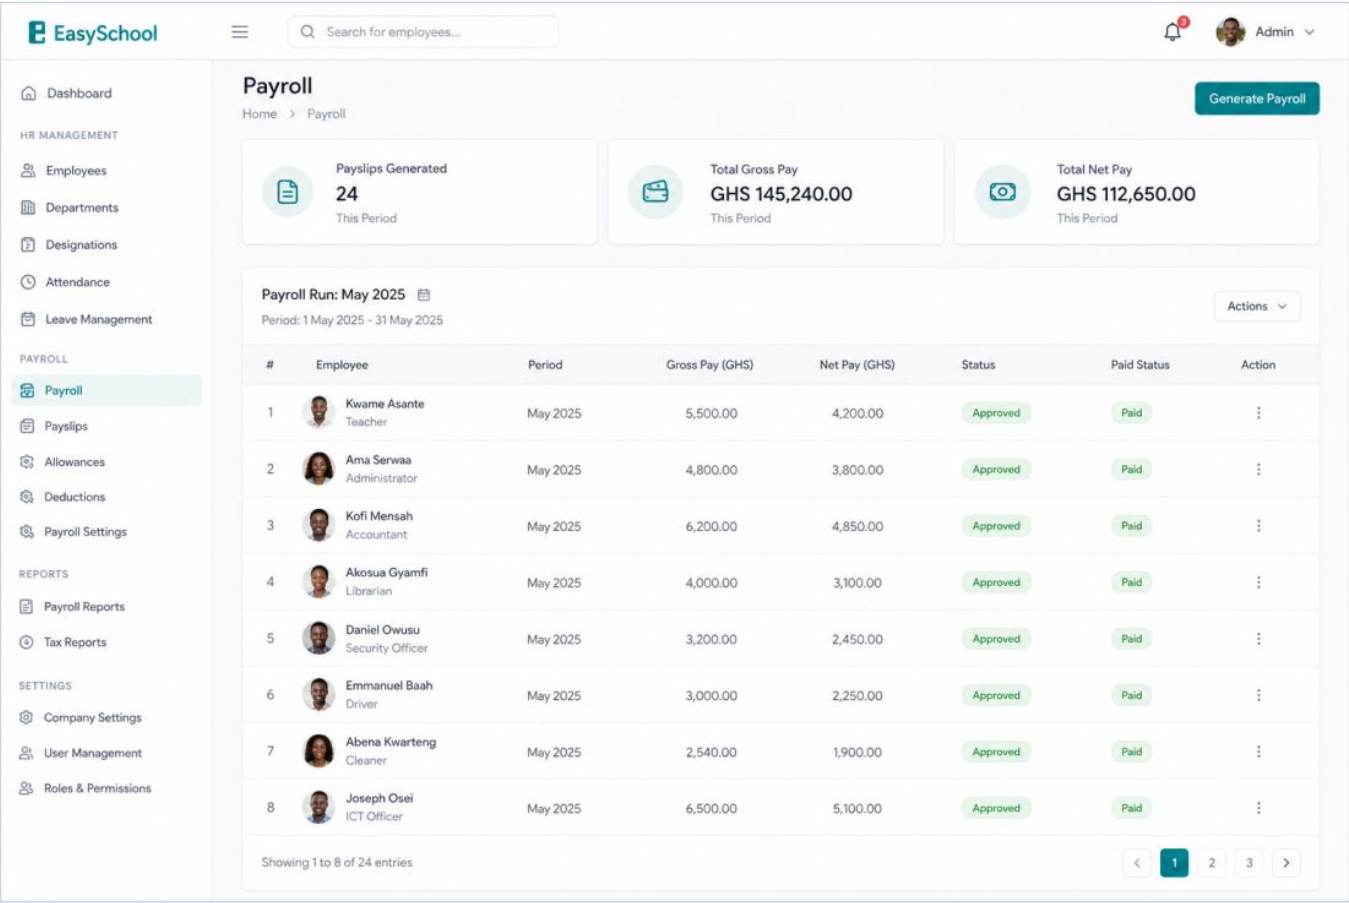

Figure 7. HR payroll — generate a month, review payslips, then approve and mark paid.

10.1 Add an employee

Menu: HR → Add Employee

1. Complete personal details, job, department, and position.
2. On system access, give a login email, password, and user category if the person should sign in.
3. Tick teacher-related flags if they will appear in Teacher Directory and assignments.
4. Save. The person appears under Employees. You can attach documents from the profile.

10.2 Employees list

1. Search, filter by status or department, and open a record to view or edit.
2. Print or view the staff ID card from the profile where available.

10.3 Departments and positions

1. Create departments (Academic, Accounts, Administration).
2. Create positions (Head Teacher, Teacher, Bursar) and link them to departments as needed.

10.4 Leave

1. Define leave types (annual, sick, maternity) if they are not already there.
2. Record a request: staff, type, start and end dates.
3. Approve or reject. Approved leave shows on the HR attendance calendar.

10.5 Staff attendance

1. Open HR → Attendance.
2. Mark present / absent (and check-in / check-out if you use times) for the day.

10.6 Salary structures

1. Create pay grades, earning types (allowances), and deduction types.
2. Assign a grade or basic salary on the employee's HR employment section.

10.7 Payroll and payslips

1. Open HR → Payroll. Choose year and month.
2. Generate the draft. EasySchool calculates gross, SSNIT, PAYE, and net from statutory settings and the employee's structure.
3. Open the run, review each payslip, then **Approve** (this locks totals).
4. When money has been paid, mark the run **Paid**.
5. HR → Payslips lists slips. Print an individual payslip for the staff file.

10.8 Appraisals and statutory settings

1. Record appraisals against an employee when your school uses performance reviews.
2. Statutory Settings hold SSNIT and PAYE parameters used by payroll. Change them only when tax rules change, and preferably before generating a new month.

Tel: 0302 123 456

OFFICIAL RECEIPT

Receipt No: GRJHS-00012345

Date: 20/05/2024

Received From: Kofi Mensah

Student ID: GH-2024-0007

Class: JHS 2 Green

Payment Method: Cash

DESCRIPTION	AMOUNT (GHS)
Tuition Fee – Term 3	800.00
Library Fee	100.00
ICT Fee	150.00
Exam Fee	200.00
TOTAL PAID	1,250.00

Thank you for your payment.

Record Payment

Figure 8. Cashier screen — student balance, bill lines, and Record Payment.

11.1 Billing items

1. Create items the school charges: Tuition, PTA, Feeding, Uniform, Exam levy.
2. Keep names stable; reports group by these items.

11.2 Category bill setup

1. Pick a class category (for example Primary) and academic year / term.
2. Tick items and amounts that apply to every class in that category.
3. Save. New or assigned students in those classes receive the matching bills.

11.3 Student bills and editing

1. **Student Bills** is the ledger: who owes what. Filter by class or year. Print one statement or the class ledger.
2. **Edit Student Bills** — search a student to adjust a line (for example a scholarship or extra charge). Use this sparingly and keep a note of why.

11.4 Record a payment (cashier)

1. From Student Bills, open the student and go to record payment (cashier).

2. Confirm the outstanding balance on the profile header.
3. Enter amount, method (Cash, Mobile Money, or Paystack), and optional reference.
4. Submit. Print or give the receipt. Paystack payments wait until the parent completes checkout; the system verifies the payment.

11.5 Print bills

1. Open Print Bills. Choose a student or a whole class.
2. Print statements for parents. Letterhead uses School Firm Setup (name, logo, address).

12. POS (school shop)

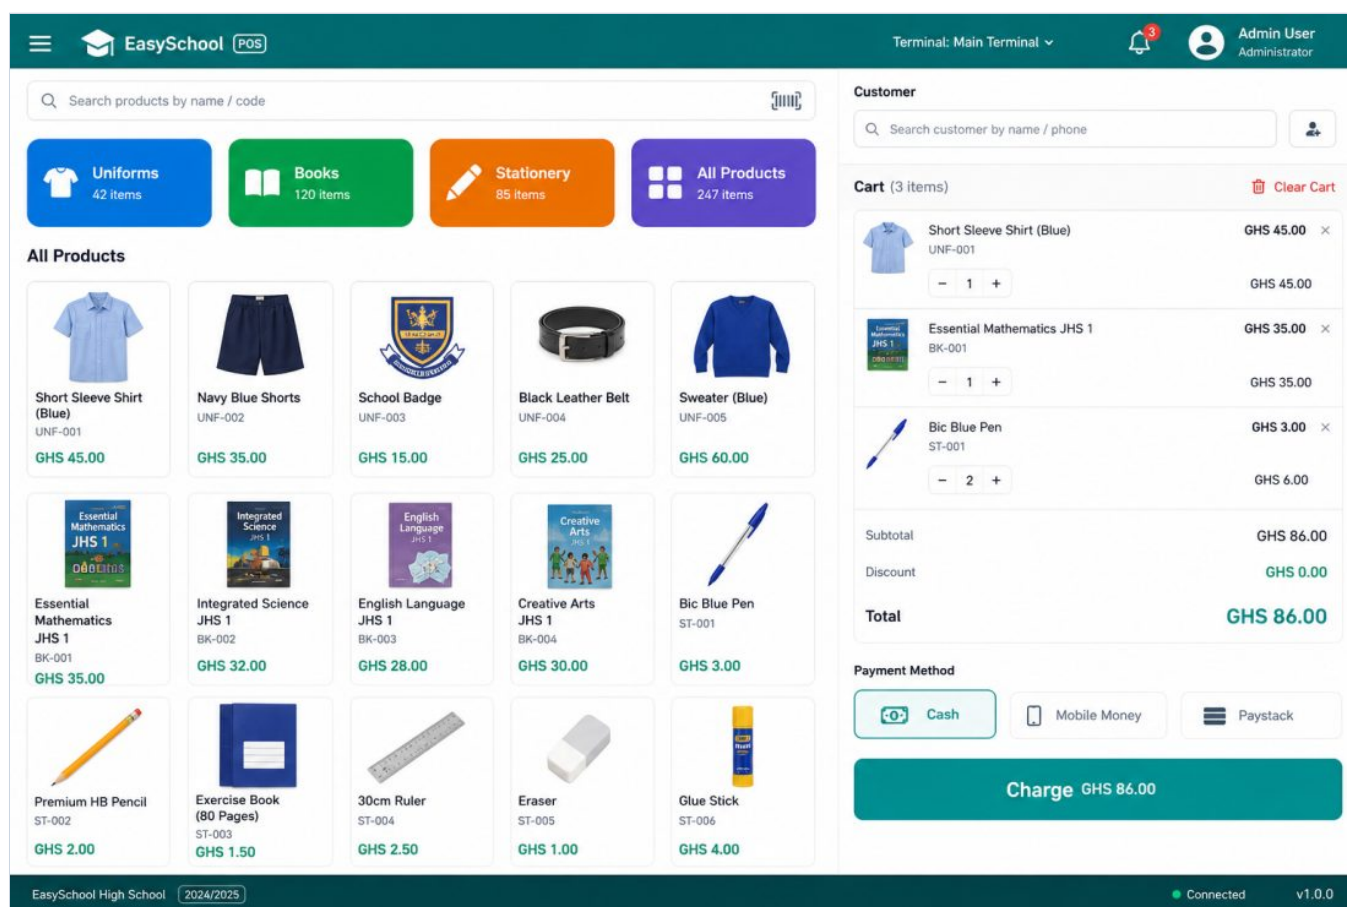

Figure 9. POS terminal — pick a category, tap products, then charge the cart.

12.1 Categories and products

1. POS → Categories: add groups such as Uniforms, Books, Stationery.
2. POS → Products: name, category, selling price (GHS), photo, and stock-related fields.

12.2 Stock adjustments

1. Open Stock Adjustments when goods arrive or are damaged.
2. Choose the product, quantity in or out, and a reason. Save so the shop stock stays correct.

12.3 Make a sale

1. Open POS → New Sale.
2. Optionally search and attach a student as the customer.
3. Tap a category box, then tap products to add them to the cart. Adjust quantities if needed.
4. Choose payment: Cash, Mobile Money, or Paystack.
5. Complete the sale. Print the receipt from the success screen or later from Sales History.

12.4 Sales history

Filter by date, reopen a sale, and reprint the receipt.

13. Expenses

Menu: Expenses → Categories, then Record Expenses

1. Create categories (Utilities, Transport, Maintenance, Fuel).
2. On Record Expenses, click add. Enter date, category, payee, method, amount in GHS, and reference (cheque or MoMo ID).
3. Edit or delete a row if it was entered in error (only if your role allows delete).
4. Use the KPI cards and category bars on the ledger to see spend in the selected period.

14. Timetable

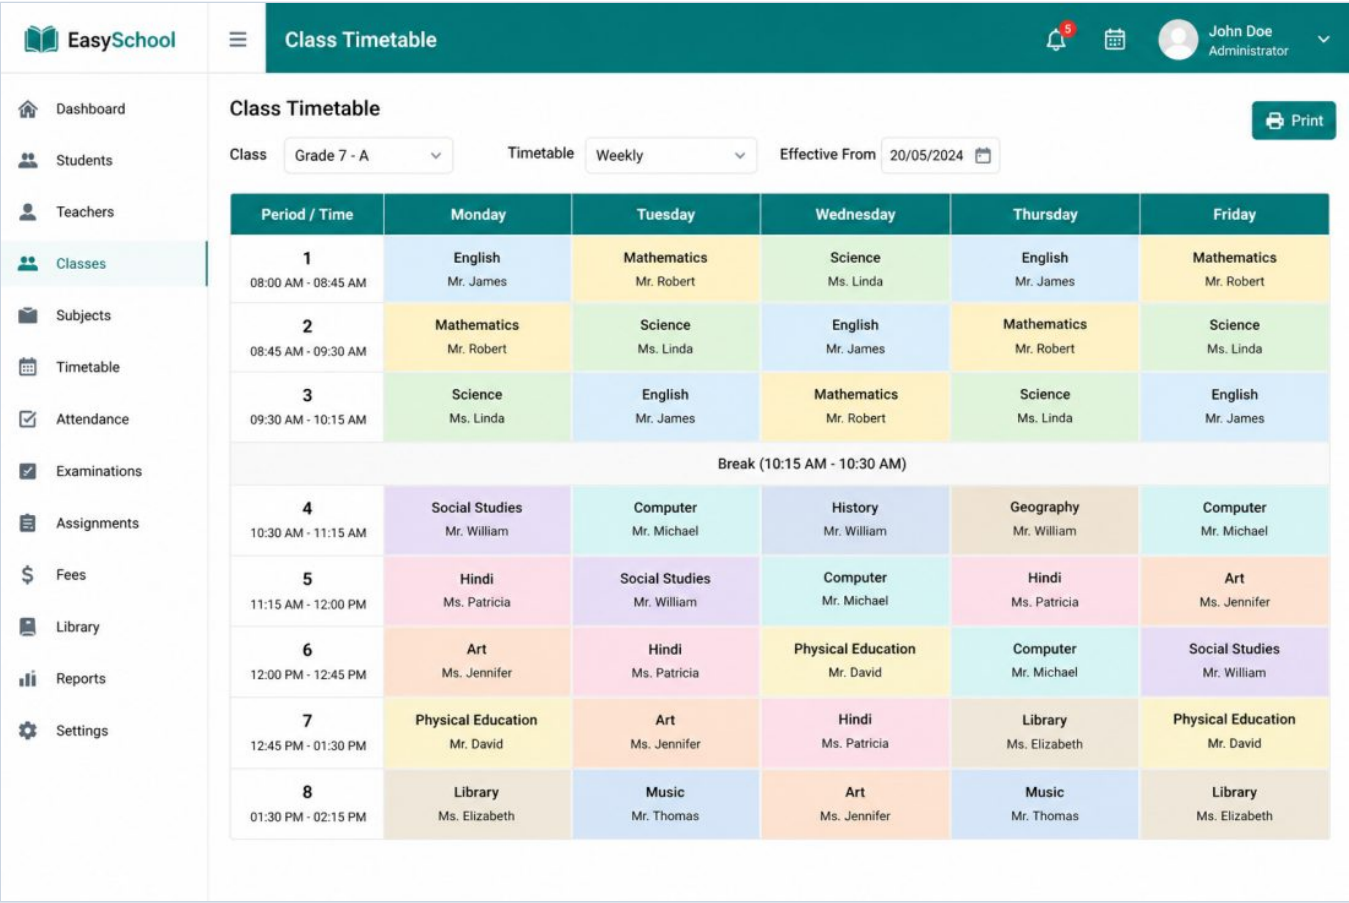

Figure 10. Weekly class timetable with coloured subject blocks.

14.1 Period times

- 1. Open Timetable → Period times.
- 2. Pick a class and weekday. Add periods, breaks, and assembly with start and end times.
- 3. This daily template is reused when you generate or edit the week.

14.2 Class timetables

- 1. Open Class Timetables and choose a class (and year/term).
- 2. Generate the week from the period template, then place subjects and teachers in each slot.
- 3. Print the timetable for the staffroom or the class notice board.

15. Send SMS

The screenshot displays the 'Send SMS' interface in the EasySchool application. The sidebar on the left contains navigation links for various school management functions. The main content area is titled 'Send SMS' and includes a breadcrumb trail: Home > Communication > Send SMS. It features a 'Select Audience' section with five options: Teachers, Staff, A class, Entire school, and Individual. Below this is a 'Message' text area with a character count of 152 / 160. The 'Recipients (23)' section shows a list of names: Aarav Sharma, Diya Singh, Kabir Patel, Meera Iyer, Rohan Das, and +18 more. A 'Send SMS' button is at the bottom. On the right, a 'Recent Campaigns' section lists five campaigns: Holiday Notice, PTM Reminder, Fee Due Reminder, Sports Day Invitation, and Exam Schedule, each with a 'Sent' status and a 'View All' link.

Figure 11. Compose SMS — choose an audience, write the message, then send.

1. Open Send SMS → Compose SMS.
2. Choose the audience:
 - **Teachers** — active teaching staff
 - **All staff** — every active employee
 - **A class** — parents / guardians of that class
 - **Entire school** — all student guardians
 - **Individual** — type names; pick people as chips (not a long checkbox list)
3. If you chose a class, select the class. The recipient count updates.
4. Type the message. Watch the character count.
5. Click send. Recent campaigns appear on the same page with sent counts and status.

SMS uses the school SMS gateway configured on the server. People without a phone number are skipped. Check the SMS log report if a campaign looks incomplete.

16. Reports

Every report has the same pattern: filter, preview, then **Print** (indigo), **PDF** (rose), or **Excel** (green). Filters you apply on screen are included in the export.

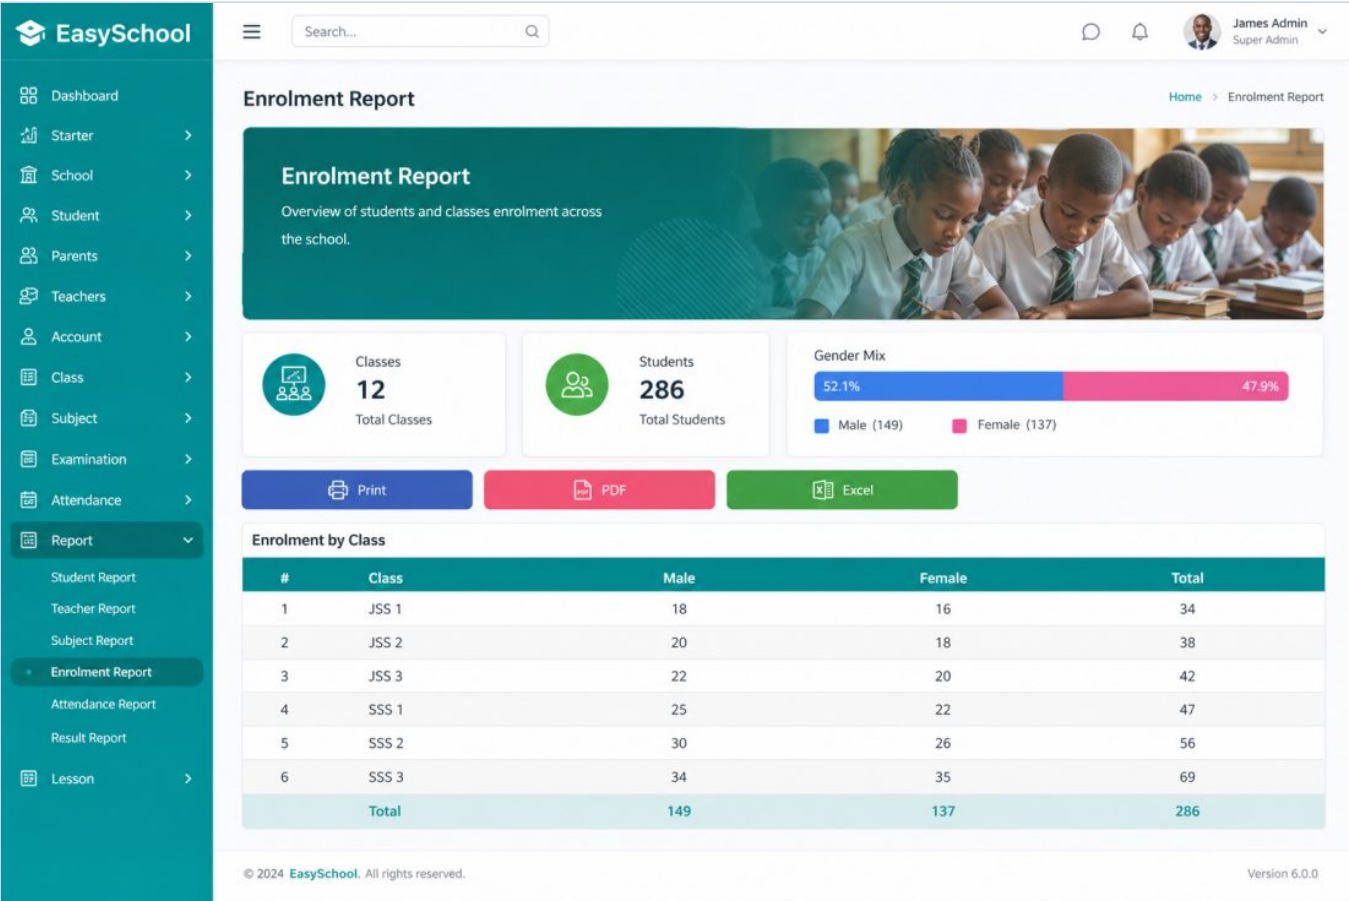

Figure 12. Enrolment report — KPI cards, gender mix bar, and Print / PDF / Excel.

How to run any report

1. Open Reports and pick the report from the sidebar.
2. Set filters (class, dates, status). Click **Apply**.
3. Read the coloured summary cards, then scroll the table.
4. Click **Print** for a letterhead print view, **PDF** to download, or **Excel** for a spreadsheet.

Report	What it shows	Typical use
Student list	Learners, class, gender, status, phone	Roll / contacts
Enrolment	Headcount by class and gender, mix bar	Inspectors, planning
Staff list	Employees, department, position, status	HR files
Leave	Leave applications and days	HR reviews
Staff attendance	Daily staff marks, check-in / out	Punctuality
Payroll	Payslip gross, SSNIT, PAYE, net	Finance

Report	What it shows	Typical use
Fee collection	Payments received with receipts	Daily takings
Outstanding bills	Balances still due	Debt follow-up
POS sales	Shop sales by receipt and cashier	Shop audit
Expenses	Outgoing spend by category	Budget
Class attendance	Present / absent / late / excused register	Parents, GES
SMS log	Campaigns sent and counts	Communications

17. Dormitory

Menu: Dormitory → Dormitory Setup

1. Add **houses** (for example Red House, Blue House).
2. Add **dormitories** under a house (rooms or halls) with bed capacity.
3. Assign a boarding student to a house, dormitory, and free bed. Unassign when they leave or change room.
4. The page shows available beds so you do not overbook a dorm.

18. Settings

18.1 School Firm Setup

Menu: Settings → School Firm Setup

1. Upload the school logo.
2. Enter official name, motto, address, phone, email, and website.
3. Save. This letterhead appears on bills, receipts, report cards, timetables, and report PDFs.

18.2 Academic years and terms

1. Create the academic year (for example 2025/2026) and mark it Active.
2. Create terms (Term 1, Term 2, Term 3) with start and end dates, linked to a year.

18.3 Academic session (defaults)

1. Open Academic Session.
2. Set the **default year** and **default term** the whole school is working in.
3. Dashboards, gradebook, bills, and timetables follow these defaults unless a page lets you pick another period.

18.4 Assessment types

1. Add types teachers can pick: Homework, Class test, Exam, Project.
2. Teachers cannot create an assessment until at least one type exists.

18.5 Promotion settings

1. Set the pass mark or rule used by Student Promotion.
2. Save before the promotion exercise at the end of the year.

19. User Management

Menu: User Management → User Categories

1. A **user category** is a role (Administrator, Bursar, Teacher, Cashier).
2. Add a category and tick every menu page that role should see.
3. Edit a category to grant a new module (for example Reports or POS) without creating a new login.
4. On the employee record, attach the person to a category and give them a password so they can sign in.

If someone says a page is missing, first check their category ticks, then confirm the employee is Active and has a login.

20. Parent Portal

The **Parent Portal** is a separate website for guardians. It uses a different sign-in page from staff (`/parent/login`). Parents see only their own children — linked by the **guardian phone number** stored on each student record.

Account setup. When a student is registered or updated, EasySchool can create a parent account from the guardian phone. Administrators can backfill all active students with `php artisan parent:sync-accounts`. The default password is set in school configuration (commonly `Parent123` until the parent changes it).

20.1 How parents sign in

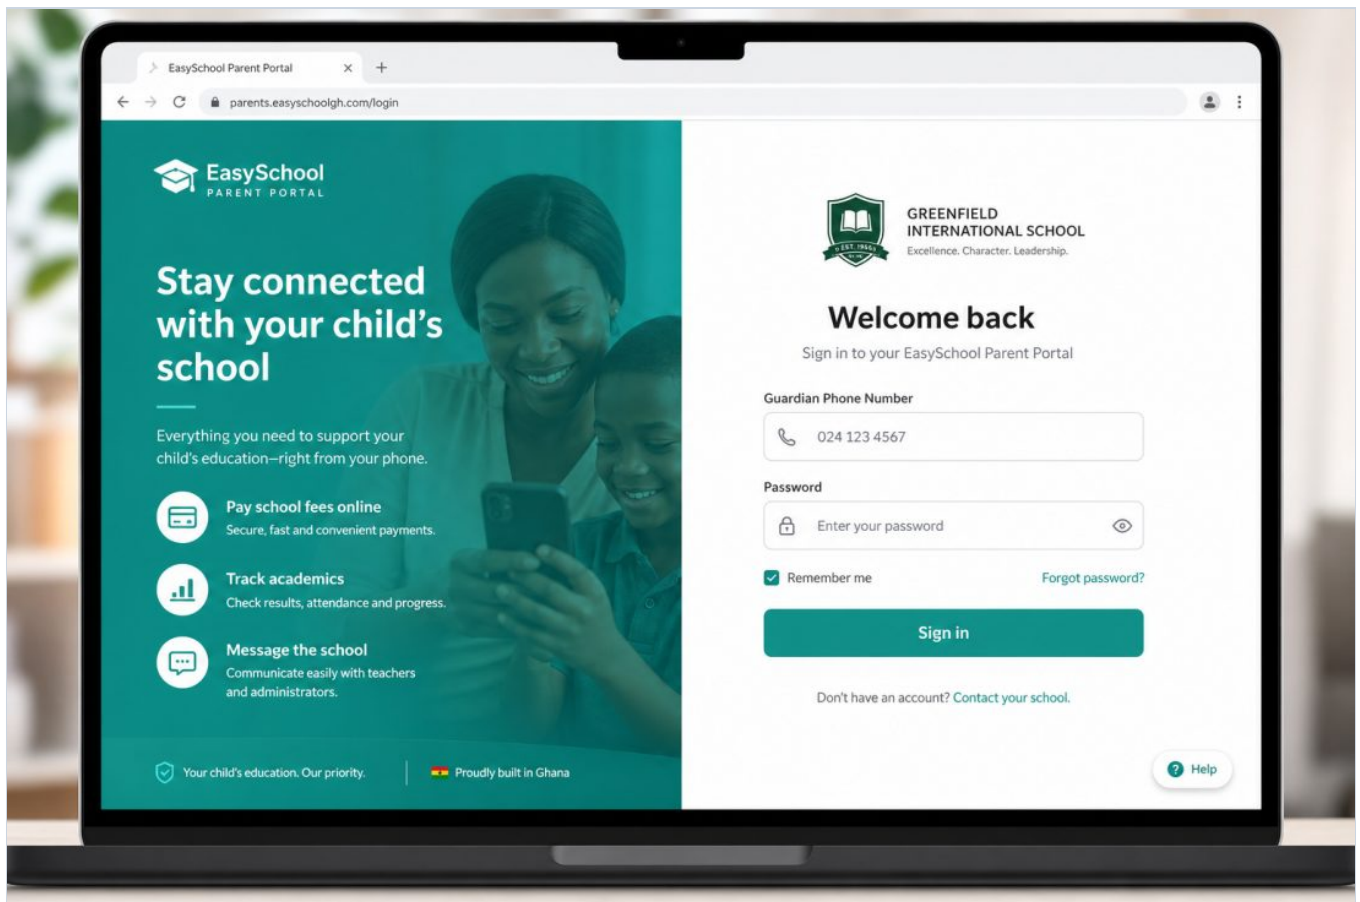

Figure 13. Parent sign-in — guardian phone and password. Staff use the main school login instead.

1. Open `/parent/login` (for example `http://127.0.0.1:8000/parent/login`).
2. Enter the **guardian phone** number exactly as stored on the student record.
3. Enter the password the school provided.
4. Click **Sign in**. Parents with more than one child see all linked learners on the dashboard.

Wrong phone? If no children appear, confirm the guardian phone on the student profile matches the number the parent is using. Update the student record and run `parent:sync-accounts` if needed.

20.2 Parent dashboard and child overview

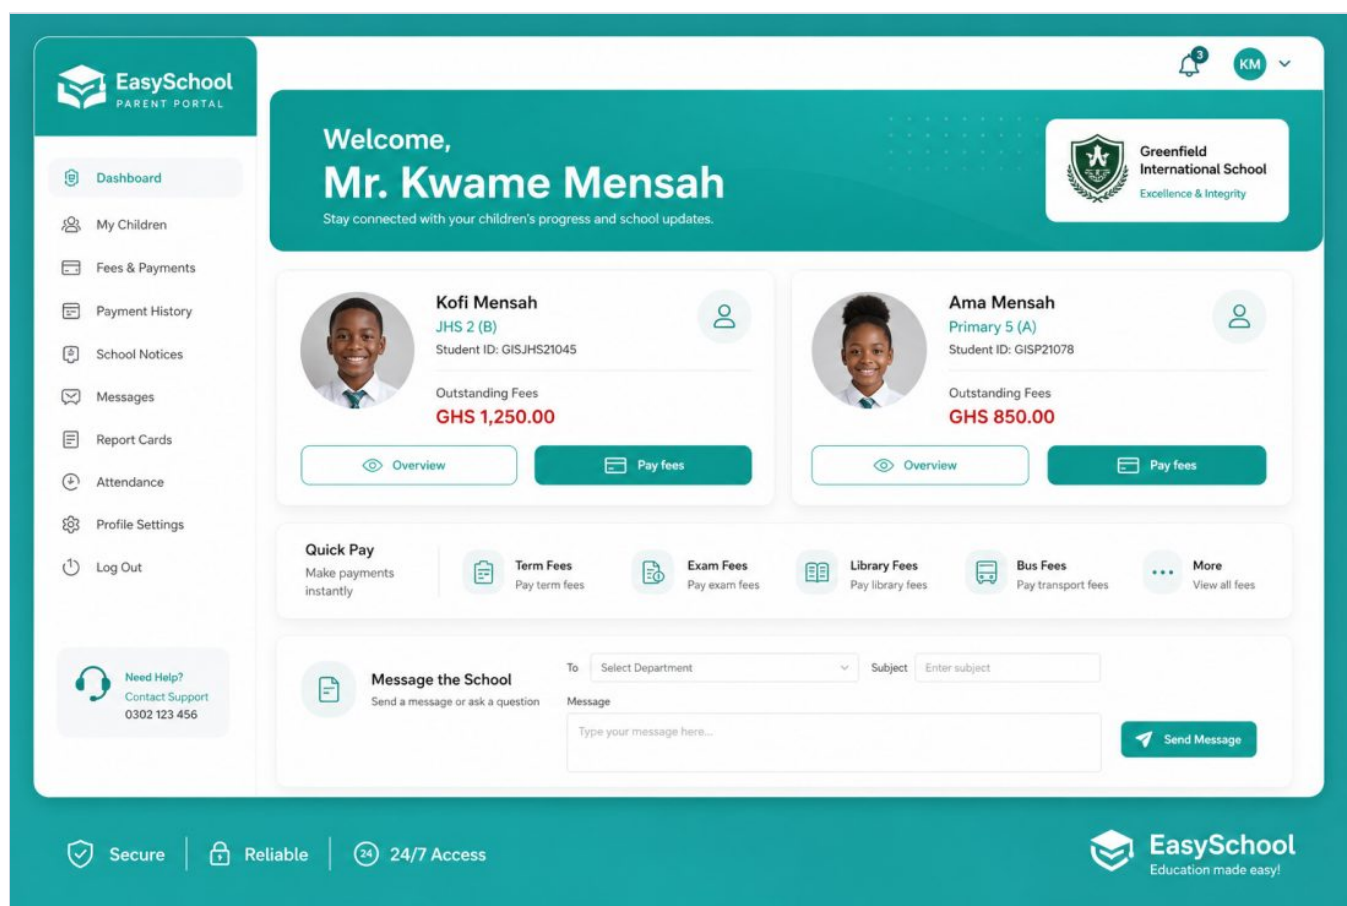

Figure 14. Parent dashboard — linked children, outstanding fees, quick pay links, and message to school.

1. After login the parent sees a welcome banner, school name, and a card for each linked child.
2. Each card shows class, student ID, and **outstanding fees**. A green tick means fees are clear; red means payment is due.
3. Click **Overview** on a child to open their workspace with colourful quick-access tiles.
4. Quick tiles include **Academics**, **Fees & bills**, **Payments**, **Report card**, and **Messages**.
5. Use the form at the bottom of the dashboard to send a quick message to the school office.

20.3 Academics and report card

1. **Academics** — pick academic year and term to view subject grades, class position, term average, and attendance summary.
2. **Report card** — same period filters; preview grades and attendance, then click **Print official report card** to open the formal terminal report in a new tab for printing or saving as PDF.
3. Parents cannot edit grades; they only view published results.

20.4 Fees, bills, and online payment

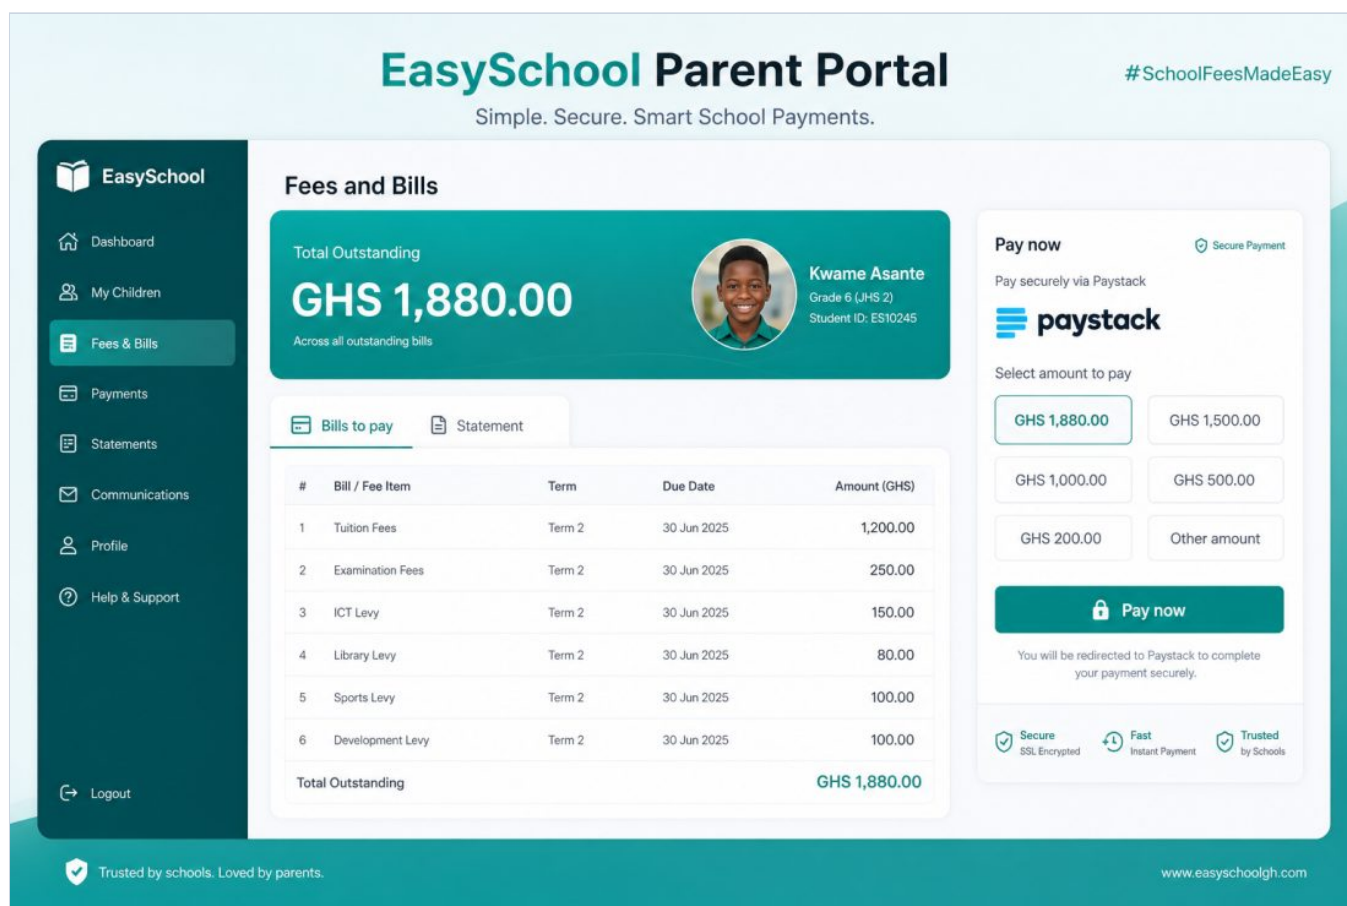

Figure 15. Parent fees & bills — outstanding table, statement tab, and Paystack pay panel.

1. Open **Fees & bills** for a child. The banner shows total outstanding, credit balance, and net amount to pay.
2. Filter by academic year and term if needed.
3. On the **Bills to pay** tab, review each fee item, amount due, and progress.
4. On the **Statement** tab, see the full bill history with status (Paid, Partial, Pending).
5. If Paystack is configured and there is a balance, use the **Pay now** panel: choose full balance or enter an amount, then complete payment on the Paystack screen (Mobile Money or card).
6. After a successful payment, open the receipt from the confirmation screen or from **Payments**.

20.5 Payment history and receipts

1. **Payments** lists every receipt with date, method, and amount.
2. Click **Receipt** to open a printable payment receipt showing how the money was applied to each bill.
3. Receipts show cash collected, credit applied, and any overpayment saved as credit.

20.6 Messages and school SMS

1. **Messages** lets a parent compose a note to the school (general or about a specific child).
2. The **Received messages** panel shows SMS alerts and school notices sent to that parent or their child's class.
3. School staff reply through the office; parents are notified by SMS when campaigns are sent from Send SMS.

21. Parent Messages (staff)

Menu: Send SMS → Parent Messages

1. Open the inbox to see messages parents sent from the portal.
2. New messages are highlighted. Click **View** to read the full text.
3. Add an internal reply note if needed, then click **Mark read / save reply**.
4. Use this inbox daily so parent enquiries are not missed.

22. Your profile

1. Open Profile from the top menu / your name.
2. Update your photo if the page allows it.
3. Change password: current password, new password (at least 8 characters), confirm. Save.

23. Suggested daily work

Role	Typical daily / weekly tasks
Class teacher	Mark attendance; create assessments; enter scores; check gradebook
Subject teacher	Assessments and scores for assigned courses
Cashier / bursar	Record fee payments; POS sales; review outstanding bills; record expenses
HR	Staff attendance; leave approvals; monthly payroll
Office / admin	Admit students; SMS to parents; parent message inbox; reports; timetable; school settings
Head / management	Dashboard KPIs; enrolment and fee reports; payroll approval
Parent / guardian	Check fees on the portal; pay online; view grades and report cards; message the school

24. Troubleshooting

Problem	What to try
Cannot see a menu	Ask admin to tick that page on your user category
Wrong password / locked	Admin resets password on the employee record
Empty dashboard	No modules granted yet, or school session (year/term) not set
Teacher cannot mark attendance	They must be assigned as class teacher for that class
Teacher cannot enter scores	Assign them as course teacher; create assessment types; register the course for the class
Bills missing for a student	Student must be in a class whose category has Category Bill Setup for this year/term
SMS not sending	Check gateway settings, guardian phone numbers, and the SMS log report
Print / PDF has no school name	Fill School Firm Setup (name and logo)
Payroll amounts look wrong	Check pay grade on the employee and Statutory Settings before regenerating a draft month
POS stock wrong	Post a stock adjustment; do not edit history sales
Parent cannot sign in	Confirm guardian phone on the student; run <i>parent:sync-accounts</i> ; reset parent password if needed
Parent sees no children	Guardian phone must match an active student; check spelling and country format
Parent Pay now fails	Ensure Paystack keys are set; bills must exist; contact bursar if online pay is disabled
